

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

Claims 1-49 (Canceled).

Claim 50 (Previously Presented): An information processing apparatus adapted to exchange information with another information processing apparatus, comprising:

capture means for capturing information including at least time information that corresponds with a time at which a predetermined content was broadcast from a broadcast source;

memory means for storing information captured via said capture means;

acquisition means for acquiring information associated with the content and the information stored in said memory means on the basis of the information stored in said memory means;

display means for displaying the information acquired via said acquisition means; and

wherein the information processing apparatus is incorporated into a cellular telephone.

Claim 51 (Canceled)

Claim 52 (Previously Presented): An information processing apparatus adapted to exchange information with another information processing apparatus, comprising:

an input device for capturing information including at least time information that corresponds with a time at which a predetermined content was broadcast from a broadcast source;

a memory for storing information captured via said input device;

a circuit for acquiring information associated with the content and the information stored in said memory on the basis of the information stored in said memory;

a display for displaying the information acquired via said circuit for acquiring information; and

wherein the information processing apparatus is incorporated into a cellular telephone.

Claims 53-88 (Canceled).

Claim 89 (Currently Amended): An information processing apparatus adapted to exchange information with another information processing apparatus, comprising:

capture means for capturing information including at least time information that corresponds with a time at which a predetermined content was broadcast from a broadcast source;

memory means for storing the information captured via said capture means;

transmission means for transmitting the information stored in said memory means to said another information processing apparatus which acquires information associated with the content and the information on the basis of the information transmitted from said ~~communication device~~ information processing apparatus; and

wherein the information processing apparatus is incorporated into a cellular telephone.

Claim 90 (Canceled).

Claim 91 (Currently Amended): A method of processing information with an information processing apparatus adapted to exchange information with another information processing apparatus, comprising the steps of:

capturing information including at least time information that corresponds with a time at which a predetermined content was broadcast from a broadcast source;

storing the captured information; and

transmitting the stored information to said another information processing apparatus which acquires information associated with the content and the information on the basis of the information transmitted from said ~~communication device~~ information processing apparatus; and

wherein the information is captured within a cellular telephone.

Claims 92-117 (Canceled).

Claim 118 (Currently Amended): An information processing apparatus, comprising:  
a recording device configured to record information related to a music playing when said recording device records said information, said music being broadcast from a remote source;

a memory configured to store said information related to said music when said music is playing;

a circuit configured to acquire information associated with the music based on said information related to said music when said music is playing; and

a display device configured to display the information associated with the music acquired with said circuit.

Claim 119 (Previously Presented): The apparatus according to Claim 118, wherein said information related to said music includes time information about a time when said music is playing.

Claim 120 (Previously Presented): The apparatus according to Claim 119, wherein said information acquired with said circuit relates to said music.

Claim 121 (Previously Presented): The apparatus according to Claim 119, further comprising a telephone.

Claim 122 (Previously Presented): The apparatus according to Claim 119, wherein said circuit comprises:

a transmitter configured to transmit said information related to said music; and

a receiver configured to receive said information based on said information related to said music.

Claim 123 (Previously Presented): The apparatus according to Claim 118, further comprising an input device configured to receive an input and wherein said recording device is configured to activate based on said input.

Claim 124 (Previously Presented): The apparatus according to Claim 123, wherein said input device comprises a button.

Claim 125 (Previously Presented): The apparatus according to Claim 118, wherein said recording device comprises a microphone.

Application No. 09/126,007  
Amendment Under 37 C.F.R. §1.312

Claim 126-135 (Canceled).
